TOPICS

- Sustainable port management
- Adaptation to climate change
- Understanding Nature: Planning, design and management of port infrastructures
- Sustainable logistic chains
- Cruises, ports and cities
- Sustainable management of the coastal front.

The selection criteria for papers and presentations will be based on the degree of adaptation to the topics proposed, innovation and the exportability of the topic. However, papers that are not strictly subject to the proposed topics may be selected, provided they fit into the general objectives of the Congress and that they have a enough technical quality according to the Technical Committee.
